EDUCATION

Bachelor of Science in Computer Science

🏫 Ateneo de Naga University

📅 2022 – 2026

STEM

🏫 Ateneo de Naga University Senior High School

📅 2020 – 2022

EXPERIENCE

Software Engineer Intern

🏢 Bureau of the Treasury Camarines Sur

📅 June – July 2025

📍 Naga City

Keywords: Full-stack development, MS Power Apps, Management System

- Designed, developed, and deployed a transaction management system using Microsoft Power Apps
- Built user interface and data management workflows for client-facing application
- Implemented data management integration for structured data and file handling
- Translated client requirements into functional system features
- Collaborated with team members to ensure consistency across adjacent systems

TECHNICAL PROJECTS

Medical Appointment System

- Designed and implemented a front-end user interface for a medical appointment scheduling system
- Used HTML, CSS, and JavaScript for UI functionalities, including user authentication, dashboards for each user type, and scheduling interfaces
- Integrated a third-party calendar library to support appointment scheduling features
- Collaborated with team members to ensure system compatibility and alignment with requirements

AI-Powered GBL Platform

- Designed and implemented a reinforcement learning-based dynamic difficulty adjustment system for a game-based learning platform
- Used Proximal Policy Optimization (PPO) via Stable-Baselines3 for model training
- Developed simulation environment and reward design for training processes
- Integrated AI component into a Unity-based game prototype
- Collaborated with team members to ensure proper integration with game logic

Steam User Analytics Platform

- Developed a user analytics platform for Steam accounts, summarizing game library and activity data, including both the front-end and the back-end
- Implemented a React front-end for the user authentication and analytics content interfaces
- Implemented RESTful back-end services using ASP.NET Core Web API
- Utilized PostgreSQL for system data storage
- Integrated the Steam Web API for user data retrieval and processing

School Chatbot System

- Designed and Developed a front-end interface for a chatbot system
- Implemented UI for user authentication processes and dynamic components for real-time chat interactions
- Built interface using HTML, CSS, and JavaScript
- Collaborated with team members to ensure front-end and back-end integration compatibility

TECHNICAL SKILLS

Frontend Technologies

- HTML
- CSS
- JavaScript
- TypeScript
- React

Languages

- Python
- C#
- Java
- C/C++
- SQL

Backend Technologies

- .NET
- PostgreSQL

Tools and Platforms

- Git
- Visual Studio Code
- Figma
- Unity
